This is in response to NAB's petition 04-160. I pay for XM Satellite Radio service - just as the NAB gets paid for their services (with commercials - which I don't have to suffer through with XM Radio). I along with many others would like to be able to hear what we ask for and XM Radio provides. Among the many stations XM offers is the local traffic and weather - which is in my mind necessary when traveling. This petition also seems to also step all over the first amendment. Please reject NAB's petition 04-160.
